

# stop denials before they begin.

Reduce write-offs and improve patient satisfaction with end-to-end authorization.

Prior authorization processes are increasingly cumbersome, negatively affecting both your revenue cycle and patient access. Janus Health **Prior Authorization** automates the determination, initiation, and statusing of prior authorizations in real time, reducing delays and facilitating timely patient care.

## Automated from start to statused

An exception-based workflow ensures your pre-service team only touch those accounts requiring authorization, saving time and reducing tedious work.

### Determination

Rapidly identify upcoming patient accounts that need authorization for a more streamlined process.

### Initiation

Janus Health **Teleport** fast-forwards staff, bypassing unnecessary steps, minimizing keystrokes, and accelerating authorization submission.

### Status

Remove uncertainties before the service by automating status searches to verify visit authorization.

## Key features

Stay in your preferred workflows with **seamless EHR integration**.

Fast-forward initiation with **Teleport** automated portal navigation.

Authorize services **beyond radiology** with coverage for cardiology, surgery, and more.

Maintain an **audit trail** of portal screenshots and payer responses in the EHR.

Enjoy high automation **success rates** thanks to stable API connections.

# 15-25%

write-off improvement

# 10 minutes

saved per authorization, reclaiming thousands of hours a year\*

# up to 80%

of your payer mix covered
